

GEETHA KOLKURI

Hyderabad, India | 9381058084 | geethakolkuri@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Entry-Level Data Analyst skilled in SQL, Python, Power BI, Excel, and Tableau, with hands-on experience in data cleaning, exploratory data analysis, SQL querying, and dashboard development. Experienced in analyzing business datasets to identify sales trends, customer behavior, profitability, and performance insights and presenting findings through interactive dashboards and data-driven reports.

TECHNICAL SKILLS

Languages: Python, SQL

Database Management & SQL Querying: PostgreSQL, MySQL (Joins, GROUP BY, CTEs, Subqueries, Window Functions, Aggregate Functions)

Tools: Microsoft Excel (PivotTables, XLOOKUP, VLOOKUP, IF/IFS, Conditional Formatting), Power BI (Power Query, DAX, Data Modeling, Slicers), Tableau (Calculated Fields, Filters, Parameters), Jupyter Notebook

Libraries: Pandas, NumPy, Matplotlib, Seaborn

Concepts: Data Cleaning, Exploratory Data Analysis (EDA), Data Visualization, Statistics, KPI Analysis, Business Insights, Reporting, Dashboard Development

Soft Skills: Analytical Thinking, Communication, Adaptability, Problem Solving, Attention to Detail, Time Management

PROJECTS

Blinkit Sales & Outlet Performance Analysis | Python, PostgreSQL, Power BI, Excel

[GitHub](#)

- Cleaned and analyzed 8,500+ sales records using Pandas to evaluate key revenue metrics across item types, outlet sizes, and tier locations.
- Engineered complex PostgreSQL queries leveraging CASE statements, window functions, and aggregate functions to compute sales distributions and percentage growth.
- Built an interactive Power BI dashboard tracking \$1.20M in total sales and a \$141 average ticket size, highlighting underperforming product categories for inventory reallocation.

Customer Shopping Behavior & Segmentation Analysis | Python, PostgreSQL, Power BI

[GitHub](#)

- Processed 3,900 customer records in Python, conducting data preprocessing and feature engineering to isolate repeat purchasing patterns.
- Implemented PostgreSQL Common Table Expressions (CTEs) and subqueries to segment shoppers by discount usage, subscription status, and purchase frequency.
- Designed a Power BI dashboard visualizing purchase behavior (\$59.8 average spend, 3.75 customer rating), identifying key revenue drivers for subscription-based customers.

E-commerce Revenue & Profitability Insights | Python, MySQL, Power BI

[GitHub](#)

- Validated and prepared multi-city transactional data in Python to track overall margin health across various sales channels.
- Executed MySQL aggregation queries to evaluate regional performance, city-wise order volume, and product-level profit margins.
- Visualized \$3.07M in gross revenue and \$613.76K in profit across 293 orders in Power BI, providing clear visibility into regional shipping efficiency.

Car Sales YTD / YoY Interactive Dashboard | Tableau

[GitHub](#)

- Structured 23,900+ sales records across dealer regions, body styles, and color options in Tableau to model historical purchasing trends.
- Formulated custom Tableau calculated fields for Year-To-Date (YTD) and Prior-Year-To-Date (PYTD) comparisons to measure YoY growth.
- Developed a high-impact visual suite tracking \$371.19M in revenue and 23.59% YoY growth, enabling dynamic filtering by dealer network.

EDUCATION

Bachelor of Technology (B.Tech), Computer Science and Engineering

Nov 2022 – May 2026

Vignana Bharathi Institute of Technology | CGPA: 9.2

Higher Secondary Education (MPC) - Intermediate

June 2020 – March 2022

Sri Chaitanya Junior Kalasala | 982 Marks

CERTIFICATIONS

- Data Analytics Essentials – Cisco Networking Academy
- Introduction to Data Analytics – Simplilearn
